

## Use comma in CSV exports on systems with Hungarian regional settings

Go to the **Control Panel, Clock, Language and Region, Change date, time, or number formats**. Change the **Decimal symbol** to **.** and the **List separator** to **,**.

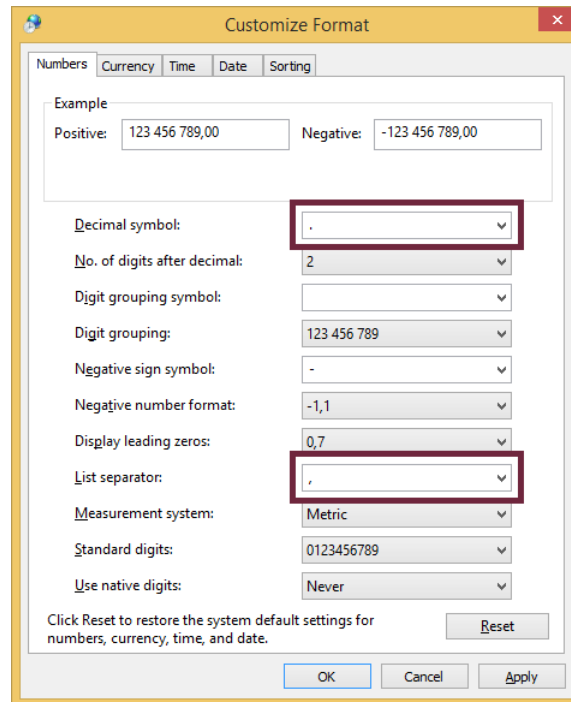

Figure 1: Regional settings

In Excel, go to **Save as** and pick the **CSV (Comma delimited)** type. In Hungarian systems, the type name is always **CSV (pontosvesszővel tagolt)**, even if you changed the list separator from semicolon to comma.
